

# palcut

YOUR WAY TO A MORE  
EFFECTIVE AND RELIABLE  
PALLETISATION

NON-STOP STACKING

# GET STACKS OF NEW BENEFITS WITH PALCUT

There are plenty of reasons to choose Palcut. Our fully automated sheet dispenser and non-slip interlayers give you huge savings and great advantages.

Compared to traditional solutions with loose sheets on pallets, Palcut offers you a more effective and reliable palletisation process. The system cuts the paper sheets to a pre-programmed length directly from the roll. This improves uptime and effectiveness – while cutting your costs, environmental footprint and space needed for storage.

## Does Palcut fit your business?

Palcut is the ideal solution for your business if you already have an automated palletisation system, use more than 100 interlayers per day for manual palletisation or if you struggle with unstable pallets.

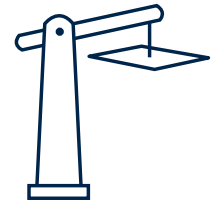

# WE HAVE INCREASED OUR PRODUCTIVITY BY MORE THAN 15% WITH OUR AUTOMATED SHEET DISPENSER FROM PALCUT

Kim Bøgh  
PTU Manager / Arla

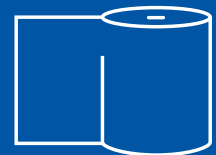

## OPERATION

# Operate faster, reduce downtime and increase productivity

- The robot only picks up one sheet at a time as there is always only one sheet ready for collection
- Collection always takes place at the same height
- Switching to another sheet size takes a split second

## SUPPLY

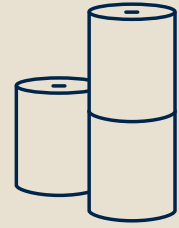

# Simplify your work processes and change rolls in no time

- Number of store changes is reduced by up to 90%
- Automatic changing of up to six sheet sizes
- Rolls can be changed regularly – outside safety zones

## STORAGE

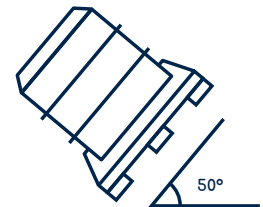

# Optimise the usage of square meters with less space needed for storage

- There are up to 3–4,000 sheets of paper per roll
- Up to 90% less space needed for storage
- Up to six sheet sizes from the same roll

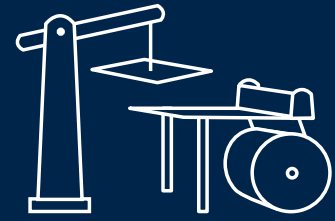

## TRANSPORTATION

# Increase customer satisfaction and safety during transportation

- Stable structure where the pallet can be tilted up to 50 degrees
- Fewer damages during transportation because fewer pallets cave in
- Compliance with regulations for safe transport (DIN 12195-1)
- Column stacking is possible because the sheets bind the layers together

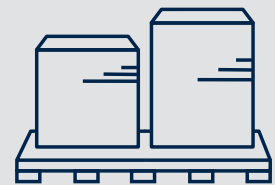

## INSTALLATION

# Save money from day one with plug and play installation

- Easy to install – only requires 230 V to operate dispenser
- Easy integration with the palletisation system's control
- Quick run-in of robot, as only one sheet can be dispensed at a time

## ENVIRONMENT

# Reduce your paper consumption and environmental footprint

- Thinner interlayers reduce paper consumption
- No waste due to lost sheets
- 100% recycled paper
- Reduced consumption of film due to non-slip paper

## DEDICATED TO ENSURE NON-STOP STACKING

At Palcut, we aim to unleash your full potential in packaging by increasing uptime and efficiency while reducing costs.

We have more than a decade of experience and 500 systems running in Europe. This makes us experts in stabilised palletisation. Every day, we use our vast knowledge to tailor packaging solutions for companies like IKEA, Lantmännen, Sofidel, Aqua D'or, Kellogg's, Mondelēz and Arla Foods.

With our state-of-the-art automatic dispenser and anti-slip paper, we continually strive to set new standards in packaging. We ensure faster operation and less downtime with our automatic solution cutting custom-sized paper from rolls – ready for palletisation.

Your productivity is our mission.  
Every day. Non-stop.
